

CREATION CORPORATION Pty Limited

ACN 064 312 438

9 August 2005

Introducing Don Neal, PC Software Developer, Consultant, Computer Contractor, Director

Don has twenty four years (since 1981) intensive experience with Microcomputers and programming in that environment. He is an experienced programmer and database application developer in Microsoft Access (including Client Server Applications using SQL Server 7 and 2000), VBA, VB6, Visual Interdev, Microsoft FrontPage, and many others.

Don has been a full time PC Software Developer in Canberra since April 1989 when he established D&H Computing (also known as D&H Computing PC Software Development).

Don has been involved with MSAccess intensively and continuously since September 1993. He has also developed advanced HTML and Web Site Skills and has developed websites for Defence, Writematrix and SwaineAdeney. He has extensive experience and competence in analysis, design, programming and implementation of client-server applications using Microsoft tools (VB6, SQL, VBA, INTERDEV) on Windows 98, 2000, 2003 and NT platforms. He has developed and tested client server applications on the Creation Corporation Studio Network (Windows 3.11 + 95 + 98 + 2000/NT5/2003 + Novell) and at Government Departments. He was intimately involved with the testing and finetuning of the Centre Link Touch Screens for 5 months at IBM involving significant uploading of SQL data to the government mainframe and testing it against the automated client-server datamining by the AJS (VB5) Application.

He has competent MS Visual Basic 6.0 and SQL Server skills. He has developed and converted a number of Access 95/97/2000 to Access 2000 + SQL Server 7.0.

- Contact Notification Database Access 2000 + SQL Server 7.0
- Contract Applications Management Access 2000 + SQL Server 7.0
- Extract FavoritesV2000 Access 2000 + SQL Server 7.0
- Extract FavoritesV2000 VB 6.0 Project + Access 2000
- Extract FavoritesV2000 VB 6.0 Project + Access 2000 + SQL Server 7.0
- Extract FavoritesV2000 VB 6.0 Project + SQL Server 7.0
- Mail Project (for Medibank Private project) VB 6.0 Project and MAPI
- Cicerone Installation Application VB 6.0 Project for Cicerone Project

Don established Creation Corporation Pty Limited in April 1994 to facilitate the development and provision of a full range of customised Software Solutions, Interactive Multimedia, and other Media and Promotional Products. It is structured into four divisions centred around the Multimedia Studio and Office at Florey, (Canberra), Australia.

Don is available for contract work as a key person through Creation Corporation Pty Limited and/or through your preferred Agency. He is primarily requiring MSAccess, SQL Server, Web Site and VB6 development work - particularly where it involves high level communication and consultancy skills. It can be seen from the resume that he has skills transcending that of your average PC Computer Programmer.

He is immediately available for (contract or permanent)

<ul style="list-style-type: none"> • MsAccess development • SQL Server development • VB6 development 	<ul style="list-style-type: none"> • Web Site development <ul style="list-style-type: none"> • HTML development • JavaScript development • Visual Interdev development 	<ul style="list-style-type: none"> • PDF development • Multimedia development • CDROM Project Management • Specification development
